TECHNOLOGY BUYBACK:
EDUCATION TRADE-IN AND TRADE UP
Turn surplus technology into cash

Nearly every school in North America has a fleet of aging IT assets that still hold value. Fortunately, you can tap into that value with the Trox Buyback Program and convert end-of-life IT devices into cash for your next refresh cycle.

Through the program, we offer end-to-end IT asset disposition (ITAD) services, including:

ASSET VALUATION

PACKAGING AND REMOVAL

SECURE DATA DESTRUCTION

DETAILED ASSET REPORTING

ENVIRONMENTALLY SOUND RECYCLING

ECONOMIC RECOVERY

ENVIROMENTAL STEWARDSHIP

Trox is committed to environmental compliance and risk mitigation for school districts as we maintain a zero-landfill and zero e-waste export policy. To ensure quality and transparency in responsible recycling services and environmental protection, our facilities are ISO 9001/14001, OHSAS 18001 and R2-certified. This is aligned to industry standard compliance with federal and state legal requirements.

REFRESH YOUR IT EQUIPMENT AT **YOUR OWN PACE**

Rather than wait for your entire IT devices to reach the end-of-life stage, trade-in any assets that are no longer in use for credit with the Trox Buyback Program. Then, turn around and use your credit to purchase new devices as needed throughout the year.

100% GUARANTEED **DATA DESTRUCTION**

The process used in the Trox Buyback Program is NAID AAA-certified, which means we guarantee 100% data destruction and provide serialized, auditable reporting that meets the NIST standard. All data-bearing devices remain secure as they move through the ITAD process, protecting your district from potential liability.

TWO BUYBACK OPTIONS TO **MAXIMIZE FLEXIBILITY**

We offer two ways to turn aged assets into bigger budgets:

1) **Transaction-by-transaction basis**

2) **Revenue-sharing agreement**

Through the first option, we provide condition-based quotes for devices based on their age and specs. If you agree to our proposed payout structure, we collect and grade every device and issue a credit for future purchases through Trox for the total amount.

If you choose to enter into a revenue-sharing agreement with us, we take on all the e-recycling responsibilities, including collecting devices throughout the year as they reach the end-of-life lifecycle. All your IT devices will go through our rigorous ITAD process in a secured facility. We will recycle non-working and obsolete devices and remarket working IT devices at a Fair Market Value (FMV) and share the revenue with the school.

Want to know more? Learn how we've helped major school districts 'cash' in on old devices, get a free valuation, or schedule a call with a Trox ITAD specialist today.
