1:1 LEARNING
PREPARE STUDENTS FOR THE DIGITAL ECONOMY
Prepare students for the digital economy with 1:1 classrooms.

The fast-changing digital economy will require students and teachers to be fluent in digital technologies and highly adaptable to fast-changing technology trends. A one-to-one learning environment lights a spark for students and teachers and puts them on the path to lifetime learning and discovery using technology.

Empower students and teachers with Troxell’s complete and integrated 1:1 Learning Suite solutions—featuring a wide range of devices and peripherals, collaborative software, and content filtering applications.

We also offer a Buy Back program that will enable districts to advance/maintain their one-to-one/mobile devices initiative as well as flexible financing options, configuration services, and more. We can even help you do a test run to ensure that everything checks out!

Our nationwide local experts—and our valued relationships with industry-leading vendor partners—can support your one to one classroom.
MAXIMIZE YOUR 1:1 INVESTMENT WITH COMPLETE SOLUTIONS FOR K-12
Choosing the right devices for your 1:1 initiatives can quickly send you down the rabbit hole of comparing technology specs. To narrow your options, consider what you want to accomplish in the classroom, how many devices you’ll need, how long they’ll stay relevant, and what your infrastructure—and budget—will support.

Rely on our valued relationships with industry-leading manufacturers, as well as local Troxell Account Executives across the nation, to support your 1:1 learning initiatives. We’ll start by understanding your needs and choosing which operating system you prefer, and then match those needs with leading Chromebooks and Windows-powered devices.

We’ll also help you access powerful management tools that enable your technology team to efficiently manage and secure your mobile devices and productivity tools that allow students and teachers to complete their daily learning objectives.

You can also be sure that we’ll work closely with you to ensure your project meets your deadlines and stays within budget.

Let us help create the right 1:1 learning solution for your environment... your Troxell Account Executive can show you how.
Maximize available funds by selling back aging or end-of-life devices.

Whether you’re buying devices for the first time or refreshing existing ones, Troxell can help fund your 1:1 program by turning older equipment—regardless of condition—into cash or credit!

Skip the hassle of recycling equipment that’s no longer needed. We’ll clean the hard drives, then package old devices up and responsibly dispose of them for you. At the same time, you’ll earn cash or credit to help equip students, staff, and teachers with new devices. It’s an easy way to get rid of equipment that’s no longer usable and increase available funding for your project!

**TIP**
Scour storage facilities for “device dinosaurs” languishing in the dark... you’ll free up space and earn funds, too!

Your Troxell Account Executive can help you determine the value of your devices, and package them up for you... just ask and we’ll get a budgetary quote to you quickly!
LEASE IT

Plan and sustain your budget for long-term flexibility.

Sustainability can be a real challenge for 1:1 projects. Leasing allows you to accurately budget future spending by spreading your investment out over a defined period. At the same time, your school and district can deploy the same devices across campuses, making it easy to manage, track, and support them.

Why lease?

• Build a sustainable refresh model that supports budget initiatives.
• Create a predictable IT equipment budget with little to no upfront costs.
• Confidently meet school board and community technology initiatives.
• Stay ahead of fast-changing technology curricula and pedagogies.
• Deploy fast to quickly get devices into classrooms.
• Simplify help desk service and resources to save time and money.
• Standardize equipment across campuses for easier management and support.
• Add white glove delivery and setup services to take the hassle out of deployments.
• Align payments with budget cycles for greater predictability.
• Customize refresh periods to occur during summer to minimize classroom disruption.
• Build in return logistics to complete the lifecycle plan.
ENHANCE IT

Add peripherals and accessories to power, protect, and enhance devices.

Add peripherals—such as headphones, keyboards, mice, and cases—to enhance your 1:1 solution. Then add flexible options for charging devices and connecting them to the big screen, engaging curious minds with leading educational software, and tracking and managing devices and other school assets for full lifecycle visibility.

TIP

If devices go home with students, consider protective cases. If devices stay in the classroom, consider charging options to keep them always ready for use.

Make your rollout a success! Ask your Troxell Account Executive to recommend accessories and peripherals to enhance your 1:1 solution.
Add integration and installation services to get up and running fast!

Save time and hassle—and get devices up and running fast—using our end-to-end White Glove services. From unboxing to enrolling devices on the network, you can be sure that devices are ready to use when you need them.

**Choose from these White Glove Service options:**

- Unboxing
- Activation/enrollment/imaging
- OS updates
- Asset tagging
- Etching/Engraving
- Loading pre-selected software
- Inserting devices into protective cases
- Loading devices into charging carts/lockers
- Providing localized physical deployment at district or school

**TIP**

Save time and minimize disruptions by having Troxell build and set up charging carts on or offsite, and then deliver them to classrooms ready for use!

Skip the hassle of device rollouts! Your Troxell Account Executive can provide service options that allow you to focus more on your district’s strategic priorities.
Track and manage school assets for complete lifecycle management for as little as $1 per device.

Getting devices into the hands of teachers, staff, and students challenges most schools and districts. School Asset Manager, the only dynamic, cloud-based asset management solution for education, allows you to track and manage all school assets—including devices—so you know their status at all times.

Simply tag assets and scan them into your database. Then roll out devices to individuals, collect digital signatures, and even capture a photographic record—in less than a minute and for as little as $1 per device. It’s a powerful way to reduce costs and improve accountability.

With School Asset Manager, you can:
- Automate the asset management process and throw away lists and spreadsheets!
- Personalize it to meet the unique needs of your school or district.
- Easily schedule repairs and replacement for cost-efficient lifecycle management.
- Report on any criteria, including device type, location, status, lease info, and more.
- Instantly access your complete asset database in case of loss, theft, disaster, or other disruptive event.

Want to see how it works? Get a FREE 30-day trial just by registering for free School Asset Manager training... ask your Troxell Account Executive how!
CONTROL IT

Take control of your devices with security and productivity software.

Prevent students from making changes to their devices or accessing sensitive or inappropriate content—even allow teachers to see what students are doing from their teaching devices—to improve security and productivity. Troxell offers a range of applications to address multiple classroom needs, from content filtering to classroom management to productivity.

Google Creative Apps bundles
Teach kids how to produce videos, create music and podcasts, and animate their thinking with WeVideo, Soundtrap, and Explain Everything.

GoGuardian
Have everything needed for a successful 1:1 program—from cloud-based filtering and self-harm alerts to teacher/student chat and screensharing.

Lightspeed Systems Relay for Chrome
Track usage and activity to ensure Chromebooks are used appropriately—both on and off the school or district network.

Hapara
Gain visibility into students’ work by making it easier to view and manage it in the cloud, saving teachers time and allowing them to personalize assignments.

Google Chrome Licensing
Access device settings to control user access, customize features, configure network access, and more for a specific Chrome device or fleet of devices.

Microsoft Intune for Education
Manage policies, apps, and settings—more than just Windows settings, too—for your Microsoft classroom devices.

Netop
Save time, enhance learning, and keep students safe and on task by allowing teachers to view everything on their devices.

CatchOn
Collect up-to-the-minute data on every device type and all app, software and website activity, allowing teachers to see all activity on all devices.

LightSail
Access thousands of outstanding fiction and nonfiction texts and create personalized libraries for each student based on their reading abilities.

Neverware
Transform your school’s older PCs and Macs and manage them as Chromebooks for faster, more secure, and easier to manage devices.

TIP
Seek out freeware and other apps that can boost classroom management and learning.
CONNECT IT

Put it all together and share it on the big screen.

Allow students and teachers to collaborate on lessons and share their work by connecting their devices to a projector or large-format display. Troxell offers leading solutions for instant wireless connectivity with advanced presentation capabilities for increased classroom collaboration.

Actiontec | Airtame | Barco ClickShare | Crestron AirMedia | ELMO Huddle Space
Kramer VIA GO | Splashtop | wePresent

Need to share information with the whole class? Explore connectivity options for your 1:1 solution with your Troxell Account Executive!
Give teachers greater confidence using classroom technologies.

Distributing devices to teachers and students is only half of the battle; gaining the confidence to use them effectively and integrating them into lesson plans is crucial for learning.

Our mission is to ensure that teachers can effectively use any product or solution regardless of where the product or solution was purchased for the classroom. That’s why we offer a robust menu of training services addressing our education technologies.

Through our national network of top Professional Development Consultants for the educational market, we can help your teachers become more confident with devices and learn how to incorporate student device use into the curriculum.

Troxell Partner Network

Ask your Troxell Account Executive to help you build a Professional Development plan around your requirements—and give teachers the technology confidence they deserve.
Ensure devices are always available and working for classroom use.

Did you know that 19-23% of devices in schools will experience some sort of breakage? Troxell helps you reduce device downtime with locally supported extended warranty options for your devices. This comprehensive extended warranties may include a 24-48 hour turnaround via a local service center and OEM replacement of broken components—all for a fraction of the cost of a manufacturer warranty.

Visit TroxellSolutions.com and select Warranties for all warranty information.
