PHOENIX, Sept. 17, 2018 /PRNewswire/ -- Troxell, a national leader in education technology & collaboration solutions for more than 60 years, is excited to announce two newly created STEM/Makerspace roles supporting their Collaborative Learning Spaces solutions.

"Education technology has changed tremendously over the years and Troxell understands the importance and impact of the STEM/STEAM and the "Maker Movement" in educating students today," says Bob Berry, Troxell Vice President of Business Development. "Troxell is committed to our role as a leader in this category and is demonstrating this by making the necessary investments to ensure we can educate and provide up-to-date expert and technology resources to school districts nationwide."

For the past three years, Terra Norine has been Troxell's Account Executive for San Diego. Recognizing her focus on this category, she is expanding her role to Troxell's Director of STEM & Collaborative Learning. Terra will continue to manage the same territory but will also focus on developing Troxell's vision and strategy for this category on a national basis."

"I am passionate about technology and collaborative learning and I'm an evangelist of all things STEM," says Terra Norine. "I look forward to this new opportunity to bring STEM technology into classrooms nationwide."

Alongside Ms. Norine, Troxell has created the role of STEM & Collaborative Learning Specialist, now filled by Emily Cook. Emily joins Troxell having worked as a site-based resource teacher with an emphasis on STEM in the Escondido Union School District (CA) for the past three years.

"I'm excited to come on board with Troxell," says Emily Cook. "I believe we have the unique opportunity to truly support schools by helping them create innovative student-centered learning solutions which positively impact student experience and achievement."
