PHOENIX, Sept. 6, 2017 /PRNewswire/ -- Troxell, a national leader in education technology and collaboration solutions for more than 60 years, is happy to announce Terra Norine's STEM Playground event. This event will be set over the course of four days and will feature innovative STEM and MakerSpace products from Troxell's partners. These partners will display virtual reality, augmented reality, robots, 3D printers, coding tools, and much more. Attendees will be able to experience and test these new technologies firsthand.

"I am very excited to host our first ever STEM Playground," said Terra Norine. "This idea came to life after spending the last year in schools working with teachers and principals seeking to improve their STEM programs. I wanted to provide a format where teachers and principals have a unique opportunity to experience the latest STEM tools on the market. This gives them the opportunity to discuss ways to incorporate these tools into their lessons through examples, sessions, and hands-on experiences."

Terra Norine prides herself in being a lifelong learner and an evangelist of all things STEM. When she was eighteen years old, she was selected to intern as an Information Security Manager for the Department of Defense weapons division. It was during this time that she found her passion and love for technology and collaborative learning. In 2016, she joined the Troxell family to continue working in the field that motivates her the most: education and STEM. Terra is very involved with the districts and schools within San Diego, providing guidance and solutions for their technology initiatives.

The STEM Playground will be from September 11th to September 14th, 2017, and will visit five school districts in the San Diego area. Attendees will have the opportunity to take part in various STEM sessions, have hands on experience with new technologies, and discuss classroom integration strategies with STEM experts. This event will also provide attendees direct access to STEM consultants, manufacturers, and Troxell representatives.
